Sample information:

Date obtained (DD-MM-YYYY): _____-_____-_____

Your referring laboratory reference #: _____

☐ Blood in EDTA (purple top tube): min. 2 x 4 mL (0.5-3 mL for newborns)

☐ DNA: min. 5 ug in low TE buffer (Source: _____)

☐ Tissue* (Source:_____)

*Please contact the laboratory directly to discuss prior to sample submission

Bone marrow transplant / Transfusion

Has the patient undergone bone marrow transplant? ☐ Yes ☐ No

Date of bone marrow transplant (DD-MM-YYYY): _____-_____-_____

Testing for patients who have received an allogenic bone marrow transplant must be completed on a pre-transplant sample or a non-hematologic sample.

Has the patient received a blood transfusion? ☐ Yes ☐ No

Date of last transfusion (DD-MM-YYYY): _____-_____-_____

Blood obtained for genetic testing should ideally be collected at least 2-4 weeks after the date of the last transfusion

For laboratory use only:

Date (DD-MM-YYYY) | **Time Received**:

Requested test:

☐ **Genome-Wide Sequencing** (concurrent sequencing with the proband)

☐ **Segregation analysis** (targeted testing for variant(s) of uncertain significance)

Family member sample submitted:

Proband name/MRN: _____

Relationship to proband: _____

Pedigree # (if known): _____

Clinical status:

This individual was clinically examined: ☐ Yes ☐ No

This individual is: ☐ Affected ☐ Unaffected ☐ Unsure

Requisition and samples must be accompanied by relevant clinical note(s) if this individual is affected.

As the correct assignment of biological relationships is required for the accurate interpretation of test results, a separate test may be performed to confirm the stated family relationships. Segregation testing of the received samples may thus reveal misattributed parentage.

Variant(s) requested for segregation analysis (if applicable):

Sequence variants

Gene	cDNA coordinates	Protein coordinates

Copy number variants / Structural variant

Gene/Region	Type of variant	Genomic coordinates

GWS submission requirements:

Consent:
The test has been discussed with the patient, the consent form has been completed, and decisions have been documented on page 5 of the proband's requisition.

Clinical information:
The following information has been provided for this individual (**if affected**):

- Phenotypic information (☐ Clinical data sheet or ☐ PhenoTips if available)
- Family history (pedigree)
- Previous testing history
- Relevant clinic note(s) and/or letters
